ASSIGNMENT 1

Application Engineering & Development - Spring 2018

Due Date : January 21, 2018 at 11:59 PM

Your Task is to build a java application that will allow a user to create a person profile and then display the results. The two use cases are:

1. Create a person profile

2. Display a person profile

In this exercise you are to define a person class with 10 of the following person attributes.

- Name

- Geographic data

- Date of birth

- Telephone numbers

- FAX number

- Email addresses

- Social Security number

- Medical record number

- Health plan beneficiary number

- Bank account numbers

- Certificate/license number

- Vehicle identifiers and serial numbers including license plates

- Device identifiers and serial numbers

- LinkedIn

- Internet protocol addresses

- Biometric identifiers (i.e. retinal scan, fingerprints)

- Full face photos and comparable images

- Any unique identifying number, characteristic or code

Notes:

- The photo image of the person is required.
